

LBNL Community Emergency Response Team Training

Join Us!

The Emergency Services Program is pleased to again offer the LBNL Community Emergency Response Team (CERT) training open to all staff beginning January 5, 2011 and concluding May 11, 2011.

What is CERT?

CERT educates participants on basic disaster response skills, such as fire safety, light search and rescue, team organization, and disaster medical operations. Building Emergency Team members are especially encouraged to enroll in this training, as it will increase one's emergency knowledge and skills at both the Lab and home.

Details

CERT training consists of five modules to be taught over five months. To better accommodate lab schedules, each module will be offered twice a month. All five CERT modules, plus First Aid (EHS-116), Fire Extinguisher Training (EHS-530) are required to complete this program.

Enroll

You can enroll in CERT training via Employee Self Service (found on the A-Z Index).

Questions

If you have any questions, please call Anne Boynton (x2240).

Module	Two Dates Offered Per Module	Time	Room Location
Module 1: Personal Preparedness (EHS-511)	Wednesday, January 05, 2011	10a-12p	66-316
